

Premier,

“Having had several years experience of development in various sectors, it was important my next role was sufficiently challenging to fully utilise and stretch my knowledge. Dealing with ‘agencies’ meant I often had to further explain my experience and goals.

Then Premier came along - very quick to spot my strengths and pattern in my career, I was soon engaged with undoubtedly the right Client. Thanks to Premier, the quality of their administration has been so good I can finally concentrate on what I’m best at - application development.

A description solely related to ‘recruitment’ does not do Premier’s team enough justice. Clearly, in many ways, PREMIER IS A CUT ABOVE THE REST!”

Senior Contract Java Engineer

Premier,

I would like to say thanks to all of Premier IT and Louise Taylor in particular for all the help and sincere efforts you have made in order to represent me in my application for a Senior Software Developer position at Bloomberg L.P. Premier IT provided me with a high-level of support from the beginning and until the very end. Thank you again for all the professionalism, patience and friendliness. I have had a nice experience working with you and I would definitely recommend anyone to contact Premier IT if they are looking for a job.

Best Regards,

Senior UNIX Developer (Financial Systems)

Premier,

I just wanted to drop you an email to say, I really do appreciate the professionalism you've shown throughout the negotiations for a particular job position. I think your enthusiasm and honesty have been very welcoming, along with your endeavour to follow things up with phone calls and emails.

This all makes for a healthy partnership between candidate and agency, and it's a shame there's not more like you out on the agency market.

All the best.

Regards

Senior Test Engineer

Premier,

I am very impressed with the way I have been treated by Russell and Premier in general. The interview and subsequent start of my contract was arranged and handled extremely well and quickly. Russell has also been calling me on a regular basis to see how things are going.

On the payment side, I have no complaints with Liam and the rest of the accounts department. I have asked for confirmations of receipt of timesheet and invoice which Liam agreed within minutes of sending my email. Payments have been made exactly as promised, regularly and on time.

I will recommend Premier with total honesty to any contractors I meet. Keep up the good work and please distribute this email to your staff as I know that it's a team effort and not just the people I named above. It's very easy to criticise but praise is hard to come by so I would if possible, like to compliment everyone on their good work.

Best regards

Contract Senior C++ Software Engineer

Premier,

Many thanks for all of your efforts over the last two weeks, as you know this morning I was offered the role of Junior Account Manager with MTI, and gladly accepted.

You have both been superb over the last few weeks, in all your dealings with me, your clients and making and arranging those interviews, you are a credit to recruiters and I should know, I did it for over four years

You know what your talking about in regards to your clients, understand what a candidate wants and do things in a consultative manner.

Cheers again and you owe me a beer on the commission? or should it be the other way round with the role you got me?.....

Speak soon,

External Sales Consultant

Premier,

Thanks so much for getting me the job at Microsoft -  
I'm chuffed and my colleagues are all jealous!

You were excellent at finding out exactly what I  
wanted from my next role and I was overjoyed when  
you found what has resulted in the perfect match.  
You were also extremely good at running through  
what was expected of me at each stage of the  
interview process and what to expect from them.  
You warned me that it would be tough which was  
good as it made me prepare a lot more than I would  
usually – and I usually prepare well!

Thanks again,

Senior Account Manager
